4	<p>Arkansas: Standard Use Measured Rate includes no calls or minutes. Lifeline Measured Rate includes 40 calls.</p> <p>Kansas: 1-Party Line Thrift Plan (obsolete) includes no calls or minutes. 1-Party Line Budget Plan (obsolete) includes \$3.00 usage allowance without regard to number of calls or minutes.</p> <p>Missouri: Message 1-Party includes 20 calls. Measured 1-Party includes no calls or minutes. Lifeline Measured Rates includes no calls or minutes.</p> <p>Oklahoma: Low-Use Service includes 15 calls.</p> <p>Texas: Economy 1-Element Measured 1-Party includes 25 calls.</p> <p>Pacific Bell has 10.116 million residential customers. There are two basic residential offerings: Measured rate service used by 13% of our customer database - \$6 per month. No per minute or per call allowance, but \$3 allowance toward local or ZUM zone 1, 2, and 3 calls. Flat rate service used by 87% of our customer base - \$11.25 per month. Unlimited local or ZUM zone 1 and 2 calls. See attached tariff.</p> <p>Nevada Bell Telephone Company offers basic measured service for standard residence, low use residences and business services. Measured service usage refers to charges for local usage on the basis of (1) the number of completed calls, (2) duration or</p>

length or conversation in minutes, and (3) time of day and day of week. There are no services that are "not charged on a per-call or per-minute basis."

However, an allowance of \$2.85 per month is allocated to standard measured residence service.

No monthly allowance applies to the total monthly message charges for exchange low use measured residence service or measured business service.

Nevada Bell Telephone Company also offers flat rate unlimited local usage service for residence and business services.

15 The number of copper pairs normally contained in drop lines or service wire "drops" for single family dwellings is two. Exceptions are made in developments where high concentrations of additional lines are present or forecasted. In these locations, and in small multi-family (e.g., duplexes, triplexes), five pair buried or six pair aerial service wire may be employed. Apartment buildings are generally served by distribution cables and terminals with three pair "inside wire" to each unit in lieu of drop lines. In all cases, the distribution cable to the serving terminal where the drop line originate is normally sized at 1.5 to 2 lines per living unit.

Multi-family units served by fiber cables (i.e., must use digital loop carrier) will have system capacity designed to meet a "feeder facility" sizing criteria of 1.1 to 1.5 lines per living unit, but the level of DSO plug-ins equipped in the filed is "present assigned

lines plus 6 months of forecasted growth” for the complex being served.

Currently both buried and aerial applications use the same two pair capacity for normal, single family installations. In the larger capacity drop lines (i.e., service wires), the standard products are an aerial six pair or a buried five pair.

17 Southwestern Bell Telephone Company will install riser cable in multi-unit properties on a regulated basis based on property owner electing to allow Southwestern Bell Telephone Company to serve each tenant in their leased space. Property owners may elect to provide their own riser cables and service their tenants themselves. In all instances where the property owner allows Southwestern Bell Telephone Company to serve each tenant up to their leased space, those facilities will be considered regulated.
